

Oxford EARTH Jams

Michaelmas 2026

All sessions will be held in the Department of Earth Sciences, South Parks Road from 12:30 - 14:00

Like a musical jam session, the idea is simple: bring people together in an open and creative space to collaborate and see what emerges.

Come along to discuss ideas, spread the word about your work, and be part of a community of people focussed on natural resources. All welcome.

Date	Session	Room
7 OCT	What Can Electrochemical Green Rust Do? Dr Orion Farr - University of Oxford	Mineralogical Lab
21 OCT	'Cobalt Rush' Film showing Prof Roy Maconachie - University of Bath Film Screening - 20 mins Discussion and Q&A - 60 mins	Mineralogical Lab
4 NOV	Critical Minerals: Opportunities and Challenges Across the Value Chain Marcin Zydowicz - High Commission of Canada in the UK	Conference Room
18 NOV	From research to impact: Policy lessons from ReSET research for Montserrat Dr Metehan Ciftci - University of Oxford	Conference Room
